MDC R50 COMPLETE

MOTOR DRIVER CARD

Control module for Norselight R50 Bus system

The MDC R50 is a motor driver/control module designed for installation inside the searchlight motor housing of Norselight R50 searchlights. The module controls the horizontal, vertical and focus motors, provides horizontal position feedback, and controls the lamp on/off function. It interfaces with the R50 Bus system, providing reliable and precise operation.

KEY FEATURES

- Designed for Norselight R50 Bus system
- Controls horizontal and vertical motors
- Can be connected for remote support
- Horizontal position feedback
- Rotary IP address selector (0-9)
- Quick IP address configuration without PC connection
- Optimised for stable and smooth operation
- Complete unit, ready for installation

APPLICATION

For use in Norselight R50 searchlights with R50 Bus system. Installed inside the motor housing. Open for third party integration

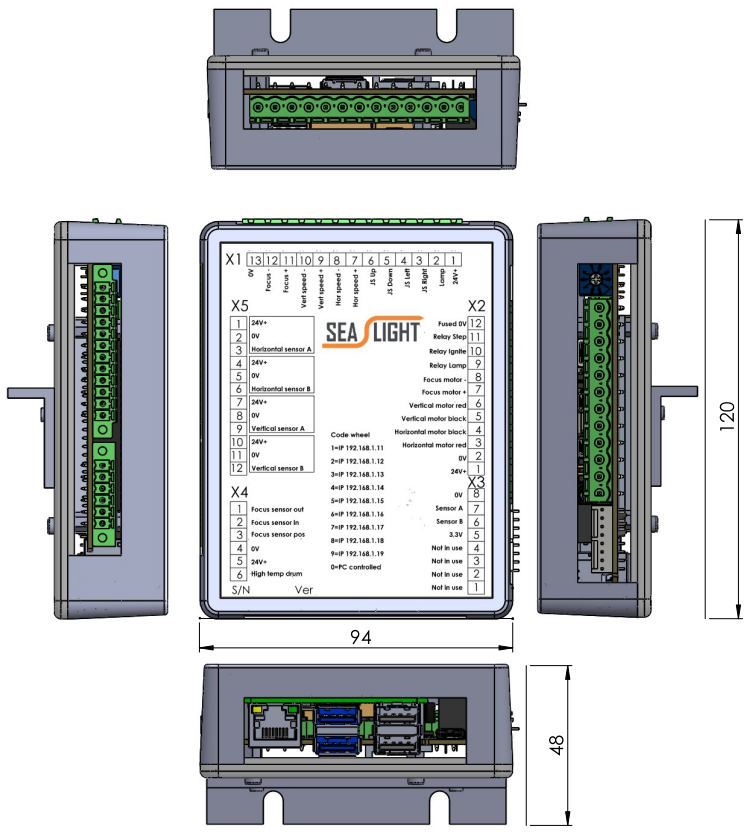

REFERENCES

Compatible with Norselight: 3023000, 1009377
